

Prior to entering our factory, all visitors must read and understand the following safety related requirements. We will make every attempt to assure that your tour is as safe as possible, however in any manufacturing environment there may be dangerous situations or potential of contact with moving equipment if the guidelines are not followed.

- a) All factory tour visitors are supplied safety glasses prior to the tour. Everyone **must wear safety glasses** throughout the plant tour.
- b) Participants must be a minimum of 13 years of age and be in the company of a parent or guardian.
- c) Shorts, skirts and open toe footwear are not allowed on the production floor.
- d) Participants with pacemakers should not tour near the laser cutting machines as they may interfere with the operation of the pacemaker.
- e) Please pay close attention to what is happening around you to avoid contact and **do not touch** any of the materials in the plant (unless invited to by the Tour Guide).
- f) Please stay with your Tour Guide at all times and do not stray from your tour group. In the event of an emergency, follow your Tour Guide’s instructions.
- g) We ask that visitors refrain from taking pictures during the tour.

Important - Present this completed form to your Bourgault Tour Guide prior to the start of the tour. It is a prerequisite to have the names of each visitor at hand during the tour.

I understand and agree to the above points from a) to g).
