

TO: All Bourgault Dealers
 ATTN: Service Manager, Parts Manager, Sales Manager
 SUBJECT: X20 to X30 (IB1 Bridge) Conversion Kit

INFORMATION BULLETIN:

BACKGROUND:

Bourgault has produced many air-seeders equipped with the Topcon X20 monitor system. At the time the X20 provided customers many features over the standard 491 and 591 monitor systems commonly used at the time on our 5000 and 6000 series air-seeders. Variable rate, guidance and mapping are a just few of the features that customers could now manage with the X20. As with all electronic systems and monitors, the X20 has been replaced with the Topcon X30 which again offers many features and benefits over the previous X20 model.

Bourgault has recently put together a kit that will allow an existing X20 equipped 5000 or 6000 series tank to be retrofitted to use the X30 (IB1 bridge) monitor system and take advantage of the many new features and benefits of the X30 monitor.

KIT NUMBER	DESCRIPTION		LIST PRICE
6318-99	X20 TO X30 (IB1 Bridge) Conversion kit		Contact dealer

Note: kits are available from the Bourgault Parts Department
